Education

Bachelor of Engineering (Computer Engineering)

Thakur College of Engineering and Technology

Jun 2021 – Jun 2025

9.48 CGPA

Higher Secondary Certificate (HSC - PCM)

Nirmala College of Science and Commerce

Jun 2021

94%

Technical Skills

Programming Languages: Java, SQL, JavaScript, TypeScript, Python

Frameworks & Technologies: Spring Boot, Spring Security, REST APIs, React.js, Next.js, Node.js, Express.js

Persistence Technologies: Hibernate, JPA, Oracle SQL, MySQL, MongoDB, Redis

Architecture & Concepts: Microservices, Data Structures & Algorithms, OOP, DBMS, System Design, Multithreading, Design Patterns, API Integration

DevOps & Build Tools: Maven, Docker, Kubernetes, Git, GitHub

Tools: Postman, SoapUI, JIRA, IntelliJ IDEA, VS Code

AI Technologies: LangGraph, LangChain, Agentic Workflows

Professional Experience

Associate Consultant — Oracle

Jun 2025 – May 2026

- Enhanced **Oracle Flexcube** core banking modules for YES Bank, delivering regulatory and business-critical enhancements aligned with RBI compliance requirements.
- Developed and optimized backend services using **Java, Oracle SQL, and REST APIs**, supporting high-volume banking transactions while ensuring reliability and data integrity.
- Implemented end-to-end validations for Nominee Management functionality and integrated downstream banking systems through RESTful services, reducing operational issues and improving processing accuracy.

Software Developer — Penguin Apps

Feb 2024 – Mar 2025

- Developed the **Bhomio trip itinerary platform** using **Java 17, Spring Boot, React.js, and MongoDB**, enabling users to create and manage personalized travel plans.
- Designed and implemented scalable **RESTful APIs** for itinerary management, authentication, and booking workflows, improving application performance and maintainability.
- Built an **AI-powered itinerary recommendation engine** using agentic workflows to generate personalized travel plans based on user preferences and destinations.

Software Developer Intern — Vighnotech

Sep 2023 – Mar 2024

- Built a full-stack Inventory Management System using MERN stack for 5+ college departments.
- Improved asset tracking efficiency by 40% through automated inventory workflows.

Projects

FoodieGo — MERN Stack

GitHub

- Built a full-stack food delivery platform with separate roles for customers, sellers, and riders.
- Developed restaurant listing, menu management, cart, and Razorpay payment integration features.
- Implemented nearby restaurant discovery (5 km radius) and real-time rider tracking.

Intelligent Database Query Agent — Python, Langgraph, Langchain

GitHub

- Built an AI-powered agent that converts natural language queries into optimized SQL and retrieves real-time data from relational databases.
- Designed a multi-step agent workflow using LangGraph for query generation, validation, execution, and response synthesis.
- Implemented tool-based architecture integrating SQL execution tools and schema-aware query generation.

Certifications

Fundamentals of Building AI Agents

View Certificate

- Developed AI agents, implemented tool calling and chaining to build structured AI workflows.

Agentic AI with LangChain and LangGraph

View Certificate

- Designed and developed autonomous AI agents using LangChain and LangGraph to perform complex, multi-step tasks with reasoning and decision-making capabilities.
